EDUCATION

Georgia State University, J. Mack Robinson College of Business

Master of Science in Analytics - Data Science and Analytics

Atlanta, Georgia

Expected December 2026

- Concentration: **Data Science in Business**. GPA: 4.05
- Awards: Graduate Assistantship, Delta Analytics Scholars.

Bachelor of Business Administration in Computer Information System (Data Analytics)

May 2025

- Honors: **Dean's List** (Spring 2023 and Fall 2024), **President's List** (Summer 2024 and Spring 2025), **Magna Cum Laude** distinction.

SKILLS

Python (pandas NumPy, Matplotlib, scikit-learn) | SQL | R | NoSQL | Snowflake| NLP| LLM| AI agent| Machine Learning | Databricks | PyCharm | MongoDB | Power BI | Tableau Data Cleaning| ETL | Data Validation| Data Modeling | Microsoft Excel (Pivot Tables, VLOOKUP) | Statistical Analysis| Data Visualization | Project Management | Critical Thinking | Microsoft Offices.

RELEVANT EXPERIENCES

Yamama Motor Corporation U.S.A

Kennesaw, Georgia

Research Analyst Intern

May 2026 – Present

- Analyze 100,000+ customer survey records using Python, SQL, and Power BI to identify trends, validate data quality, and support business decision-making.
- Develop data processing and reporting workflows that transformed large-scale datasets into actionable insights for cross-functional stakeholders.
- Leverage Python libraries including pandas and NumPy to clean, analyze, and visualize complex datasets while ensuring data integrity and accuracy.

Georgia State University

Atlanta, Georgia

Research Assistant

August 2024 – Present

Dr. Xinyu Fu, Computer Information System Department

- Summarize literature reviews to facilitate research projects, synthesizing findings into comprehensive reports by analyzing 100+ research papers mainly operating Google Sheets.
- Collect 10,000+ data from websites using Python Web Scrapping.
- Present research findings in written reports and oral presentations and collaborate with supervisor/ PhD candidates through weekly meetings to deliver project updates and align research progress with goal.

FanDuel Group

Atlanta, Georgia

Graduate Research Assistant – Data Scientist

January – May 2026

- Engineered a data pipeline processing **100,000+ sports records** from multiple sources using Python, SQL, Pandas, and NumPy.
- Designed simulation and optimization models to evaluate **10,000+ potential betting scenarios weekly**, supporting data-driven forecasting and risk analysis.
- Automated ETL and reporting workflows, reducing analysis time from **4+ hours to under 15 minutes** per update cycle.

Shepherd Center

Atlanta, Georgia

Graduate Research Assistant - Data Analytics

August 2025 – December 2025

- Collaborated on a **healthcare analytics project** analyzing stroke patient data to support precision rehabilitation and treatment planning.
- Applied **machine learning methods** (linear regression, logistic regression, KNN, Random Forest) and data-driven approaches to identify effective treatment strategies.
- Performed data cleaning, exploratory analysis, feature engineering, and model evaluation using **Python, SQL, RStudio**, and **generative AI** solution tools, delivering clinically meaningful insights to advance patient care.
- Presented to project deliverables including **technical documentation, reproducible code, and stakeholder presentations**, ensuring clarity and usability of results.

Georgia State University

Atlanta, Georgia

Learning Assistant, Mathematics and Statistics Department

August 2023 – May 2025

- Supported **1000+** students in solving problems, completing assignments, and preparing for exams deploying Excel, **100% students passed** exam with high grade.
- Communicated regularly with professors and instructors to manage with coursework's and identify areas where students need help twice or three times each week.
- Provided one-on-one and group tutoring, improving student performance and comprehension.

PROJECTS

Environmental Intelligence System

January – May 2026

- Processed and analyzed **500+ ESG and sustainability reports** using Python-based document extraction and data pipelines.
- Built a Neo4j knowledge graph and ontology to connect environmental metrics, operational claims, and supporting evidence across organizations.
- Developed a **Streamlit application** that enabled users to search reports, compare companies, and investigate sustainability performance through an intuitive interface

Healthcare Monitoring Systems - Data Management & Analytics Project

August 2025 – December 2025

- Built a healthcare monitoring system on **Databricks** using **SQL** to analyze 1,000+ synthetic patient records
- Wrote analytical SQL queries to identify high-risk chronic disease patients, with focused analysis on Type 2 Diabetes
- Enabled data-driven identification of high-risk patients and overdue follow-ups, supporting earlier intervention and improved patient management by creating a dashboard.
